

WHY NC

Live life on one level. The NC (New Concept) Line was introduced in 2010 and has become a reference in the market for cruising boats. No need to walk down steps to use the galley or step up to the helm station -- everything you need is on one level.

Designed by Michael Peters the NC Line ensures a smooth ride all while being economical. The interiors are exceptionally bright with panoramic views of the sea, while the recessed side decks facilitate easy access around the boat.

MEET HENRI JEANNEAU

In 1957, in the small town of Les Herbiers, France, Henri Jeanneau discovered his love for powerboating. He built his first wooden hull with which he placed first in the 6-hour Paris Race. A year later, the shipyard built its first fiberglass hull – a breakthrough in technology during that time. And now the rest is history.

Today, Jeanneau Outboards are built in Cadillac, Michigan and Ostroda, Poland. Jeanneau has grown over the past 60 years, with more than 400 Jeanneau Dealerships worldwide in nearly 70 countries – including the United States and Canada.
